

Compact Industrial Air Handler

ONSITE Manufacturing

Chilled Water Cooling Specs

- Condensate pump with alarm (pump @19' of head)
- Works with chilled water or temporary chiller

Hot Water Heat Specs

- Produces over 100° F temperature delta on the air side
- Works with customer's hot water system or temporary hot water boiler @ 200° F

Product Features

- Fits through a doorway
- Variable speed drive on fan to control air flow
- Very quiet at any fan speed
- 3-way fork lift pockets and removable casters for easy placement
- Water coil approved to 250 PSI
- Steam coil approved to 75 PSI
- One or two 20" discharge ducts available - diffuser or custom outlet connections available

Product Specifications

Water Connection	1.5" Victaulic
Power Requirements	480 V 3 phase 10 amp
Power Connection	Leviton CS-81-65C (male on AH)
Air Flow	5,500 CFM
Cooling, 20 tons BTU/hr	250,000
Hot Water Heat BTU/hr	600,000
Steam BTU/hr	384,000
Width×Length×Height	32×67×52 in.
Discharge Duct Diameter	20"
Weight	1,130 lbs.
